

Clean Up America!

THE SANITIZER™ EVAPORATIVE TOILET

- Economical and easy to install and maintain!
- Compact (25" long x 20" high x 17" wide), portable, and ADA compliant!
- Ideal wherever traditional sanitation is unavailable or impractical, such as:
 - tiny homes, cabins, and recreational areas
 - resting failed septic systems combined with graywater systems
 - military alternative for bases, outposts, and training areas
 - natural disaster areas where alternative sanitation is needed
 - RVs, mobile homes, boats, and houseboats
 - emergency response vehicles
- Waste is reduced to an odorless, sanitized form which is easily and safely discarded in the household trash.
- Operates on 120v household, solar, or generated current.
- Invented, manufactured, serviced, and distributed in the USA (Patent No. 9,301,659 B1)!

Environmentally
Friendly

A self-contained, large
capacity and waterless
toilet

Requires NO water, NO chemicals,
NO sewage or drain hookups, and
NO pumping and dumping

Conveniently sanitizes
human waste on site
